

Introduction to **Carbon Accounting**

Introduction to **Carbon Accounting**

TAFE Course Number 27636

Course Overview

This course will show its participants the reasoning behind the current debate over emissions trading.

The session will focus on two key areas, how to calculate greenhouse gas emissions and how these emissions could be managed.

This is a large and complex subject and this course aims to present a compact summary of value to members of the general, business and industrial community.

A panel of experts will cover areas such as:

- ✍ Calculating your Carbon Footprint
- ✍ How does an Emissions Trading Scheme such as Carbon Pollution Reduction Scheme work?
- ✍ Carbon Management Principles
- ✍ Carbon Accounting
- ✍ Carbon Offsets
